

DAY 2 Flexbox Mastery & Responsive Design

If you get stuck or feel missing refer this code file
Github Code: [Aayushpradhan88-js/Webdev](https://github.com/Aayushpradhan88-js/Webdev)

1. Flexbox Deep Dive

→ Flexbox is the backbone of modern layouts.

Key Controls

- Alignment → positioning items
- Justify content → spacing across main axis
- Gap/spacing → distance between items

Real Understanding

→ Flexbox is not about properties—it's about:

- Controlling direction
 - Managing space
 - Aligning content properly
-

2. Real Layout Building

→ You built:

- Navbar
 - Section layouts
-

Learning Outcome

- How to structure UI
- How to divide sections
- How to align content

3. Responsive Design

Websites must adapt to:

- Mobile
 - Tablet
 - Desktop
-

Mobile-First Approach

- Start small screen
 - Scale up
-

4. Media Queries (Practical)

Used only when needed.

Rule

- Don't use too many breakpoints
- Fix layout only when it breaks
