If you get stuck or feel missing refer this code file

Github Code: [Aayushpradhan88-js/Webdev](https://github.com/Aayushpradhan88-js/Webdev)

1. Spacing System

→ Spacing defines design quality.

Margin vs Padding

- Margin → outside space
 - Padding → inside space
-

2. Visual Enhancements

→ Used for better UI:

- Shadows → depth
 - Borders → structure
 - Gradients → visual appeal
-

3. Transitions & Hover Effects

→ Used to:

- Improve user experience
 - Add interactivity
-

4. Positioning (Practical Use)

→ Use only when needed.

Real Use Cases

- Fixed navbar
- Overlay content
- Floating elements
